Step2: There are two options to select your Backupify emails or folder click on any one with which you want to perform the migration.

- Select (Backupify) files To select and convert 1 file at one time
- Select folder having (Backupify) files To select and convert multiple files at one time.

Also our Backupify Converter will not ask you to rename your files with any extensions it will directly select the file as it is. There is no need to rename the file for selection.
